

**Some Flowers Bloom Dead**  
**The Wallflowers**

Intro: **Bm G A Bm Bm G A D**

**Bm**                    **G**  
We didn t make it  
                         **A**                    **Bm**  
We did not pull through  
**Bm**                                    **G**  
You shouldn t blame me  
         **A**                                    **D**  
I don t blame you  
**Bm**                                    **A**                    **G**  
Now what else did you think  
         **A**                                    **Bm**  
that I would do?  
                         **Bm**                    **A**                                    **D**  
ooooh as if it wasn t hard enough  
**Bm**                                    **G**                                    **A**  
I m so tired of waking up  
                         **Bm**  
feeling bad  
**Bm**                                    **G**                                    **A**                                    **D**  
You haven t been the kind of place I have  
**Bm**                                    **A**                                    **G**  
Could it hurt you now  
         **A**                                    **Bm**  
to let this pass?  
                         **Bm**                                    **A**                                    **D**  
ooooh as if it wasn t hard enough

Refrão:

**D**                                    **A**  
You want to make it so much harder  
**D/F#**                                    **G**  
Now in another world  
                         **D**                                    **A**  
I could learn to forget  
**D/F#**                                    **G**  
But til then I m here  
                         **D**                                    **A**  
making room for new regrets  
                         **Bm**                                    **A**                                    **G**                                    **D/F#**  
Now some flowers they never bloom  
                         **Bm**                                    **A**  
And some flowers just bloom dead

( **Bm G A Bm Bm G A D** )

**Bm**                    **G**  
The way you make me feel  
**A**                    **Bm**  
I could collapse  
**Bm**    **G**                    **A**                    **D**  
An epidemic I cannot outlast  
**Bm**                    **A**                    **G**  
How could you feel used  
**A**                    **Bm**  
when I feel trapped?  
                  **Bm**    **A**                    **D**  
ooooh as if it wasn t hard enough  
**Bm**                    **G**  
And just as my conscience  
**A**                    **Bm**  
starts to clear  
**Bm**                    **G**                    **A**                    **D**  
I drag the river and you re still there  
**Bm**                    **A**                    **G**  
The way I bring you down  
**A**                    **Bm**  
could not compare  
                  **Bm**    **A**                    **D**  
ooooh as if it wasn t hard enough

(Refrão)

( **G Em7** )

( **Bm G A Bm Bm G A D** )

**Bm**                    **G**  
The way I sleep  
                  **A**                    **Bm**  
this bed just can t be made  
**Bm**                    **G**                    **A**                    **D**  
I pull the covers up around my head  
**Bm**                    **A**                    **G**  
Now when I think of me  
**A**                    **Bm**  
I think of somebody else instead  
                  **Bm**    **A**                    **D**  
As if it wasn t hard enough

(refrão)
