

Every Night Every Day
The White Buffalo

G
There s two weeks of road ahead now
Three days have passed along
Well, I m a long way from California
Gasoline, a guitar and this song

C
It s a devil s dream that dies by the dozen

G
Paid my dues in the sweatin beer and the lights

C
With these highs and lows and everything in the middle

G
Keep my woman, better get my money right

D G C
Every night____, every day

G
I m alone

G
There s good and nice and then there s wicked ones
Under the shadow, light disappears
And there s two cowboys cackling in the corner
Close my eyes, gonna check on outta here

C
There s another town will take you in the morning

G
Time will tease, no waiting for the roads to dry

C
Well, I will leave it all in the rear-view mirror

G
Put the pedal to the metal til the early morning light

D G C
Every night____, every day

G
I m alone

D G C
Every night____, every day

G
Well, I get stoned

C G
I ll eat dinner in a room in a dark saloon

C G

And that s half my money spent

C
