Wrong

The White Buffalo

So I think White Buffalo actually plays this song tunned down a half step. If you want

to play along you will have to tune down but this sounds fine if you just play and $\sin g$

along on your own.

If you don t want to tune down you could also play these chords in place:

B instead of C

F# instead of G

E instead of F

Hope that makes sense.

C G F

Everyone was staring right at me

C

Thought I was the pawn, thought that I bought on

C G F

So I looked far, as far as I could see

C F

For a way out, out of the crowd

C G F

Beedeleybeedeleybop I was baited and I bit the prize

C

To start the mark of my demise

G G

So alone I look someone to share my strife

C F

I got sucked down the siv of life

Chorus

Ф С

With their Billy clubs, boys in blue

7

They come run, running after you

F C

So I fled, I took flight

G

But I was wrong. Wrong, wrong

C G,F,C,G

But at the time it feels so right

The grips were strong and the circle it sealed on me

Thought I was down, thought that I had found

Someone to follow, someone to be

Thought I figured out what it's all about

Feedeleyfeedeley flop I was faded and I fit the crime

Looked at my face, it wasn't mine

Thinking I was right that maybe I should get away

I think twice, then I stay

Chorus

With their Billy clubs, boys in blue

They come run, running after you

So I fled, I took flight

But I was wrong. Wrong, wrong

But at the time it feels so right

Colder, colder, got to, got to get warm again

I'm gonna heat it up with my friends

Losing myself I stray to the other side

Fasten my belt and enjoy the ride

Chorus

With their Billy clubs, boys in blue

They come run, running after you

So I fled, I took flight

But I was wrong. Wrong, wrong

But at the time it feels so right

Sweet tune and a fun one to play. This is my first posted tab so would appreciate any comments or corrections.

cheers!
