Damages
The Workday Release

[Verse 1]
```
Am                            F
I m caught up in the worst of it
             C                  G
Struggling to stand against the wind
                 Am        F
And circling the deep abyss
         C                 G
Hoping to escape before I m lost
```

[Pre-Chorus]
```
                 Am          F
And I can see the light is fading
               C         G
Burning out and time is thin
                 Am             F
Don t count me with the damages just yet
               C       G
I know that I have fire left
```

[Verse 2]
```
                     Am      F
Don t think about what s caving in
               C             G
The only way to build is patiently
               Am           F
And focusing on piece by piece
                   C                         G
When everything is falling apart right from the start
```

[Pre-Chorus]
```
             Am      F
Who wants to keep on moving?
    C    G                       Am         F
The ones who do, see the light as something new
    C                     G
So make up your mind and how hard you ll try
```

[Chorus]
```
              F              C                  G
Before the world starts fading out and I hit the ground
           Am        G
I hope to know it was worth it
```

```
      F                 C                    G
Inside I think I might just lose my mind
               Am        G
But I hope to God it was worth it
F   C                  Am                       G
Oh, should I believe I can make it out and recover?
F   C   G                             C
Oh,      I hope to God it was worth it

[Verse 3]
                   Am          F
I sway between the cost of both
               C               G
To push ahead or save what I have left
                     Am        F
And it leaves me standing motionless
               C                G
Afraid that I ll be missing a chance or filled with regret

[Pre-Chorus]
        Am          F                C     G
It s a line I m faced with and I m the one to blame
     C                 F               G
And I find myself, wondering if I can change

[Chorus]
            F                 C                    G
Before the world starts fading out and I hit the ground
            Am       G
I hope to know it was worth it
     F              C                 G
Inside I think I might just lose my mind
               Am        G
But I hope to God it was worth it
F   C                  Am                       G
Oh, should I believe I can make it out and recover?
F   C   G
Oh,      I hope to God it was worth it

[Bridge]
         F                   C                   G
I can t force my lungs to breathe like they used to
          F                   C
I can t force my lungs to breathe like they used to

[Chorus]
            F                 C                    G
Before the world starts fading out and I hit the ground
```

```
        Am              G
I hope to know it was worth it
   F            C                G
Inside I think I might just lose my mind
            Am        G
But I hope to God it was worth it
```

```
        Am              G
I hope to know it was worth it
   F            C                G
Inside I think I might just lose my mind
            Am        G
But I hope to God it was worth it
```
