**this song sounds in the key of f minor. i have carpel tunnel syndrome and avoid playing bar chords when i can, hence the capo. additionally, playing this song with a capo, leads to, in my opinion, better voice leading, and also, makes it easier to play the chords and some of the solos simultaneously, which you can catch over at my youtube channel. if you don t have a capo, ask ultimate-guitar very nicely to transpose this up 1 half step.
