

About Our Universe

Tom Milsom

I am a huge fan of Tom Milsom. However, there aren't that many chords for his songs. So most of the time I have to figure it out myself. Here is one of his songs, About Our Universe, which is an awesome song. So here is what I got. I am 100% sure that these chords are accurate. It is originally played on the ukulele. There are variations on the intro and verses.

Intro **F C**

F

I was on a plane

going home at night

C

and I wondered if I could open the doors mid-flight

F

was it right

C

to want to give it's passengers a more exciting death

then they could ever imagine

F

there's a whole school of thought

that says you live what you do

C

and you are what you eat

would I be out there too?

G

with a hundred people screaming

Dm

in depressurized air

F

falling quickly like the plane

C

through the clouds down there

G

and in their last lively minutes

Dm

they'd look down and they'd stare

F

and the earth rising fast

C

at last they would care

G

about me

Dm

about me

F

about me

C

about me

and if one day

the universe

fell in love with another universe

would they

in this new reality

fall together into one singularity

and on the tiny planet

everyone would be reeling

not considering that even universes have feelings

and there d be millions of people

all condensed into one

and soon they d be dead like the birds and the sun

and each one would think the center of it all was their head

and the world would collapse and then they d be dead like me

like me

like me

like me
