

Take Me Out
Tom Milsom

Hi there. This is my first-ever tab, so wish me luck. I learned this song on ukulele so that's what these chords are for (If you want to transpose easily to guitar, a standard ukulele is a guitar capo'd down 5 frets). I'm sure that there's a more complex way of playing this song, but if anyone wants a quick idea of how to play it, this is how I do it.

Take Me Out is by the lovely Tom Milsom and all the rights belong to him, of course. The lyrics are from his YouTube video for this song. www.youtube.com/hexachordal

C There's some teenage smell to summer nothing I can do but feel it shine (oh oh)
F Woke up with rocks inside my heart but breathing in the air here makes it
F fine
C I've got that anxious little fever but I've got a way to sweat the sadness
F out (oh oh)
C Make shapes and take a little space to find a phrase appropriate to shout
----->
So I guess you'd better take me out
C There's some simplicity to sunshine a cacophonous outpour of degree (oh oh)
C Shines upon its friends when it calls to them
F
Soundless circular white suck up the seas
C You've got it and I want it
F
It's something we can't be without
C Dark scheming and light dreaming
F
This is what it is all about
C
So I guess you'd better take me out
