

**November**

**Trampled by Turtles**

The chords are the same throughout the entire song,  
i can't find the lyrics anywhere so i did my best,  
there are a couple parts that are damn near unintelligible,  
oh well, you came here for the chords didn't you? All hail the greatest  
bluegrass  
band on earth, TBT!

Capo 3

INTRO **C - G - F-C-G-C** (play the c-g-c real quick-like)

**C** **F**  
it's alright mama, it's so good to see you  
**C** **G**  
we've been out hiding for such a long time  
  
lonesome hillside surrounding november  
  
wish it'd stay the same for your whole life

**Am** **G** **C**  
the tragic church bells ring for free  
**Am** **G** **C** **G**  
hollowed out for you and me

I was drunk sunday so i don't remember  
images come flowing like a river so wide  
i was on a rooftop when i first discovered  
that you hold all your pain like a (no idea what he says here...)  
  
Under revolution clouds  
  
You fight to come up and i fight to come down  
  
everytime we find something peaceful  
  
i have to go and tear it all down

but the weather don t lie babe and you can t either

ever since i came to this faithless town

your darkened debt don t bother me

it blinds me like the morning sun

song ends on the intro chords **C-G-F-C-G-C**
