

**Song To Self**

**Travis**

Travis - Song to self  
Ode to J. Smith (2008)

This tab has been made listening to a previous version of the song. To play it as it is the album and single, skip the lines with the \ sign on the left. To play the other (that according to me sounds even better), play those lines too and skip the 2nd verse. Enjoy!

Do you see the light? Tell me you see the light
