[Verse 1]
**A          E**
Staring through a broken window
**A                                      D**
Looking at the snow covered streets below
**A                          E**
We don t have to stop right now
                              **A**
It only hurts when the night runs out
                                  **D**
You said you re tired and you wanted to go home

[Pre-Chorus]
**A                        D    A**
Is this what the clouds feel like?

Only ones left awake in the world

Counting the stars
