

Diamonds And Gasoline
Turnpike Troubadours

I pulled lyrics straight from CowboyLyrics.com and I m pretty sure they re wrong in a few spots, but I left em as is.

There are 2 or 3 guitars, I only got 1. Get creative to fill in the rest, that s what music is all about.

He finger picks these chords; he uses the very common walk down from C to Am almost every time, it s easy to hear.

Standard Tuning; Felker has a high voice so they capo almost everything, but I don t have one with me right now. Capo it to match your vocal range. Corrections to the chords are welcome.
