The Hype
twenty one pilots
[Intro] E B F# F#sus4
[Primeira Parte]
                         F# F#sus4
Sometimes I feel cold, even paralyzed
                            F#sus4
My interior world needs to sanitize
                                    F#sus4
                              F#
I ve got to step through or I ll dissipate
                                            F#sus4
I ll record my step through for my basement tapes
[Refrão]
       E B F# F#sus4
Nice to know my kind will be on my side
                 F#
                       F#sus4
I don t believe the hype
And you know you re a terrible sight
But you ll be just fine
Just don t believe the hype
[Segunda Parte]

                                  F#sus4
              В
Yeah, they might be talking behind your head
           В
                          F#
      E
Your exterior world can step off instead
             В
                            F#
It might take some friends and a warmer shirt
                                 F#
                   В
But you don t get thick skin without getting burnt
