Two Gallants

this song is played live with a capo on 2 however this tab is written to be played without a capo.

Intro: Just play F# C#7 G#m7 in different orders

Well, the summer day make a white man lazy  
Well, all I ve ever known is poor  
Owe my skin to the country store  
Dont own my walls, my roof, my door  
But he tells me I m free  
But I fight the will to live  
Hell might take but heaven gives  
It s the only one so I ll forgive  
And Im not the one to grieve

And the summer day make a white man lazy  
He sits on his porch killing time  
I gotta work to feed my wife and baby  
I work so god damn hard that it s a crime

Well, I went down to the polling place  
The white men there just laughed in my face  
Saying boy, this aint no nigger s race  
You best get on your way  
Sir, I believe I ve got the right  
Said you aint got nothing if you aint white  
And I thought I said get out of sight
