I just took what I wanted, paid the cab and I was free

Em **D** **C** **G**

C
The ballad of a broken heart

G C x2

They all sat around waiting for my next move
When the moon came up I traced a vein that wasn t a groove
And as my glass became empty, my troubles left this world
Once again it all became, became absurd

Another day in another life that has torn us apart
Another night in another time
The ballad of a broken heart

G C x4

I got stoned with my demons in a world of self abuse
I lived and slept there for a while on a slow burning fuse
Like old wet dynamite living on the edge
I never took any notice of what anybody said

Another day in another life that has torn us apart
Another night in another time
The ballad of a broken heart

Em
Blacked out, knocked down
D
Found myself coming round

C
