

**When All Is Said And Done**  
**Tyrone Wells**

I changed the key on this song to C, because the original key (G) is too low for me to sing.

                  C          G  
When all is said and done  
          C                  G                  D  
And I m looking back upon this race I ve run  
                  C                  G  
And when my heart gives in.  
          C                  G                  D  
I know you will be beside me precious friend  
                  C                  G                  D  
It s just the same from the beginning to the end  
                  C                  G  
When all is said and done.

          C          G  
If I lose my way  
          C                  G                  D  
And I wander down this open road for days  
                  C                  G  
And if the sun should fall  
          C                  G                  D  
And the dancing we once did becomes a crawl  
          C                  G                  D  
Let the memories move like shadows on the wall  
          C          G  
If I lose my way.

Harmonica Solo:

C G    C G D    C D    C G D    C G

          C          G  
When I m coming home  
          C                  G                  D  
And I walk across the bridge of death alone  
          C          D  
I will fix my eyes  
          C                  G                  D  
On the One who s waiting at the other side  
          C                  G                  D  
My old friend with countless others there beside  
          C          G  
When I m coming home  
          D    C    G  
When I m coming home
