

White As Snow  
U2

INTRO: **Em**

**Em**                    **Bm**                    **Am**    **Bm**                    **Em**  
Where I came from there were no hills at all  
          **C**                                    **D**            **Am**                    **Em**  
The land was flat, the highway straight and wide  
          **Am**                                    **F**                    **C**  
My brother and I would drive for hours  
  **G**                                    **D**  
Like we had years instead of days  
          **Em**                    **Am**                                    **D**            **G**  
Our faces as pale as the dirty snow

**Em**                    **Bm**                    **Am**    **Bm**                    **Em**  
Once I knew there was a love divine  
          **C**                                    **D**                    **Am**                    **Em**  
Then came a time I thought it knew me not  
          **Am**                                    **F**                    **C**                    **G**                    **D**  
Who can forgive forgiveness where forgiveness is not  
          **Em**                    **Am**                                    **D**                    **G**  
Only the lamb as white as snow

SOLO: (**D F Am C Em D F**)

**C**                                    **Em**  
And the water, it was icy  
  **c**                                    **Em**  
As it washed over me  
  **Am**                                    **C**                                    **Em**                    **D**  
And the moon shone abooooo...ooooove me

**Em**                    **Bm**                    **Am**    **Bm**                    **Em**  
Now this dry ground it bears no fruit at all  
          **C**                                    **D**                    **Am**                    **Em**  
Only poppies laugh under the crescent moon  
          **Am**                                    **C**  
The road refuses strangers  
          **G**                                    **D**  
The land the seeds we sow  
  **Em**                                    **Am**                                    **D**                    **G**  
Where might we find the lamb as white as snow

**Em**                    **Bm**                    **Am**    **Bm**                    **Em**  
As boys we would go hunting in the woods  
          **C**                                    **D**                    **Am**                                    **Em**  
To sleep the night shooting out the stars  
  **Am**                                    **C**

Now the wolves are every passing stranger

**G**

**D**

Every face we cannot know

**Em**

**Am**

**D**

**G**

If only a heart could be as white as snow

**Em**

**Am**

**D**

**G**

If only a heart could be as white as snow

**G**
