

Human Nature

Uh Huh Her

C

Your world has changed

Bb

In over your head

F

You re going crazy

C

And all the things that you ve realized instead

Bb **F**

They take their toll

You d stay the same

But you look up ahead

There s something out there

C

This love s a curse

Bb **F**

But reality s worse without him there

C

It s not human nature

Bb

The way he stares right through you

F

What s he made of?

C

Staring at the sea, and everything between

Bb **F**

As you watch the world fall, you watch the world fall

Same chord progression for the entire song. :)

I think your name

And you show up to save me

This is crazy

And time stands still when I look in your eyes

And they re not cold

You are so dark but at times you are light

Should I be scared now?

Made up my mind

Oh there s something you hide

But I ll stay with you
