

Dim The Headlights
Urban Dub

Title: Dim the Headlights
Artirst: Urbandub
Tuning: Drop C#

Chords:

PLEASE READ

These chords were taken from how Gabby Alipe plays it in the acoustic version. (http://www.youtube.com/watch?v=6_VdzqO-msU&feature=related)
Since he plays some chords differently, you can refer to the tab below for how he plays them, otherwise you can still stick to the original way on how the chords are played--or in however way you want to play. :)

Since I don t know what some chords are called, the letters X and Y are used to represent 2 versions of chords. You can still use the regular G chord for either G(x) or G(y), and the regular Em chord for either Em(x) or Em(y).
