```
Am                    G              C
    Everything was fine the way it was, Normal and ordinary
Am                    G                C
    Then there was you, so randomly too, And now you re staring at me

Am                            G
No one can choose who they fall for
              C                   F
Or when they fall, or how they fall, or why
Am                G              C
I, well I fell for you and I must wait, it s only a matter of time
```

[Chorus]
```
Am        F        C        G
I will wait for you my darling
