Great new band out of Toronto. This tab is just for the main guitar chords used throughout the song.

Fun to play acoustic with or without the song s reggae-influenced beats!

B		--4--	--0--	--4--	--2--
G		--4--	--1--	--4--	--3--

		Abm	E	B	F#

Verse 1 (Chords played with palm mute until the end of the verse):

Abm	E	B	F#
------------	----------	----------	-----------

Thoughts seem, to stumble out of my mouth,

Abm	E	B	F#
------------	----------	----------	-----------

I can t seem, to stop and talk to them,

Abm	E	B	F#
------------	----------	----------	-----------

Fear tries, to pierce the armour of truth,

Abm	E	B	F#
------------	----------	----------	-----------

Hollowpoint, sniper hyperbole....

Abm	E	B	F#	(These chords the rest of the way...)
------------	----------	----------	-----------	---------------------------------------

Easy as pie! When in doubt, listen to the song to get the rhythm down, otherwise enjoy!
