|-----|-----|
```

{again this is simulated through the outro with improvised leads on top in a pentatonic minor}

(I used the font Courier when I typed this out (on a Mac), so it will look correct with that font)

Here is a key of sorts:

```

                                     *
a fret number with * above it is a tap harmonic (example: 12(5) means
hold the 5th fret and tap the 12th. the 12s at the beginning are open
strings)
h = hammer on
p = pull off
t = tap w/ right hand 1st finger
X = muted thump w/ left hand 2nd and 3rd fingers
T= thumb (funk/slap)
s = slide
vib = vibrato
```

Play this section 5 or 6 times (the fade-in)

```

t          T          t      T  T          t          T      t      T  T
-12-----12-----12-----12-----12-----
-12-----12-----12-----12-----
-----
-----
-----
-----X--12--X-----X--12--12--X-----X--12--X-----12--12----
```

Now to the insane tap-harmonic fest!

Keep in mind that all of the 5th fret notes are hammered with the left hand index finger-smack em real hard! again, check out the US Festival video if you can.

h h h p h

[illegible]

h h h h p h

$$\begin{array}{ccccccc}
 & & * & & * & & * \\
 & & & & & & * \\
 & * & * & & 12(0) & -5- & 12(5) & -9- & 14(9) & -5- & 7- & 12(7) & -11(7) \\
 * & & & & 12(0) & -12(0) & -5- & & & & & & \\
 12(0) & -5- & & & & & & & & & & &
 \end{array}$$

Play the above section three times. The third time through, however, continue the tap harmonics as follows:

p h (vib)

$$\begin{array}{ccccccccc} & * & & * & & * & & & \\ -10(7) & -11(7) & -12(7) & -0 & & * & & * & & * & & * & & * \end{array}$$

For the final phrase, angle your right-hand index finger parallel to the frets, and tap across all three strings (b, g, and d strings). Use your left hand ring finger for the 9th fret, and slide to the 7th. Use the first finger for the 5th fret notes. This part is easier than it looks. Try to keep this rhythm in mind: pull-off, tap, hammer, tap, pull-off, tap, hammer, tap (etc)
