Saturday Sun
Vance Joy

```
C    Em          G
Oh, Saturday sun
     D
I met someone
C               Em
Out on the west coast
G                      D
I gotta get back, I can t let this go

C    Em          G
Oh, Saturday sun
D
I met someone
C                   Em
Don t care what it costs
                            C       Em   G   D
No ray of sunlight s ever lost

C               Em
So tired of sleeping alone
G                      D
So tired of eating alone
C
I need to ask her
Em                      G                    D
What s going on, are we going strong?

C            Em
She fell, I rested her head
   G                        D
My shoulder was the perfect height
         C
We fit so right
   Em                 G                        D
So what s going on?  Cause I ve been undone

C                    Em
The long drive, the coastline
G             D
Looking out at first light
C            Em
Am I still on her mind?
G
I ve been undone

C    Em          G
Oh, Saturday sun

And still the memory s right there
G                       D
She put the breeze in my hair
            C
No kiss was softer
Em                  G               D
Softer than this, I m reading her lips

C               Em
Oh, each night, I read
G           D
She left her books in my bed
    C           Em
And her song, in my head
G
I ve been undone
