Who I Am • Guitar Chords

By Wade Bowen and West 84

Tuning: EADGBE (normal)

Note: I decided to put this online because while the version with a capo is close, the tonality is not right enough for me! It is also the same 4 chords for the whole song, and I get bored with it so I end up embellishing the picking and strumming patterns. I am only play this with my acoustic and don't have the benefit of doing the solo, so it s not here (sorry!). Also, just so you know, I tried to put the chords right over the words that the chord hits on so that it s easier to read the two. Enjoy!
