Notes:

- All the instrumentals are the chords from the verse (C#m, E, A, A)
- I m not sure of the bridge because I can barely hear it, but this works.
- The outro is basically playing the first two lines of the chorus over and over

except you don t sing the first line. You go into it after you play the final chorus

- Listen to the original song to find out the order of what you play

Enjoy!
