

**Pull Me Over**  
**Warsaw Poland Bros**

**A** **E**  
The night was dark, your lights were bright  
**D** **E**  
You pulled me over, I wasn't feeling so right  
**A** **E**  
Stepped out to the car, rolled my window down  
**D** **E**  
Handed you my license, registration with a frown

**D** **E**  
But I could tell by the look in your eyes  
**A** **E/G#** **F#m**  
That you'd be going for a ride in the passenger side  
**D** **E** **A**  
And you wouldn't be issuing any citations

**A**  
But you tore me out the car  
**E** **D**  
Pulled my arms back too far  
**E**  
Made me walk the line and shined that flashlight in my eyes  
**A** **E**  
Made me say the alphabet backwards with your cuffs in arm  
**D** **E**  
Searched my pockets and took all my bud

**D** **E**  
You know the night is dark and lonely  
**A** **E/G#** **F#m** **D**  
Without you by my side  
**E** **A**  
I hear your sirens, run and hide

**A** **E**  
I didn't mean to write that ransom note  
**D** **E**  
It was just a joke, so I could see you again  
**A** **E** **D**  
And how many times must I rob a liquor store, to see you more  
**E**  
To just be friends

**D** **E**  
But when you pull up to that crime scene  
**A** **E/G#** **F#m**  
I knew it wouldn't be nice but oh so mean

**D**                                  **E**                                  **A**  
When you pull out your cuffs and give me all your affection

**A**  
But you tore me out the car  
**E**                                  **D**  
Pulled my arms back too far  
                                  **E**  
Made me walk the line and shined that flashlight in my eyes  
**A**                                  **E**  
Made me say the alphabet backwards with your cuffs in arm  
**D**                                  **E**  
Searched my pockets and took all my bud

**D**                                  **E**  
You know the night is dark and lonely  
**A**          **E/G#**  **F#m**          **D**  
Without you by my side  
          **E**          **D**                                  **E**  **D**  
I hear your sirens,  I hear your sirens  
          **E**                                  **A**  
I hear your sirens, run and hide
