

Party Fun Love And Radio
We the Kings

BTW, this is for the acoustic version! I tried to change it but UG won't let me change the title. Sorry about that.

the whole song is pretty much G,Em,D. this is based on watching a lot of videos. there is some parts of the song that you only strum Em once before playing a D. so, just listen to the song and figure out that. it's quiet easy to know when you need to change chords in the song. this is a tabbed version of the part Travis plays.
