

**Let Me Know**  
**Yeah Yeah Yeahs**

**E**                    **F#**                    **A**  
I couldn't see, I couldn't hear  
**B**                    **E**  
It shut me off when you were near  
**F#**                    **A**  
Like a cloud, a dusty mirror  
**B**                    **E**  
It disappears, you disappear  
**F#**                    **A**  
All a sudden, all alone  
**B**  
I'm calling out, I'm calling

CHORUS

**E**                    **F#**            **A**        **B**  
Love's gonna let me know  
**E**                    **F#**            **A**        **B**  
Like the day you took me home  
**E**                    **F#**                            **A**        **B**  
We counted every minute left to go  
**E**                    **F#**            **A**        **B**  
My love's gonna let you know

**C#m**        **B**  
Ooooh, ahhhh [x 3]

**E**                    **F#**                    **A**  
Time without you drags me down  
**B**                    **E**  
It all feels right with you around  
**F#**                    **A**  
It all feels right with you around  
**B**                    **C#m**  
Like the night we hit the ground  
**B**  
And all the lightning sends a chill  
**C#m**  
Can't forget about you still  
**B**  
All a sudden, all alone  
  
I'm calling out, I'm calling

CHORUS

**E**                    **F#**

I m calling out, I m calling

**A**                    **B**

I m calling out, I m calling [x3]
