

**Mary  
Yellow Ostrich**

I realized there wasn't a chord submission for this song, and I thought there needed to be one, so here you go!

**G**                    **C**  
Mary says it's okay,  
**G**                    **C**  
she can see the future:  
**Em**                    **C**            **Em**                    **C**  
everything turns around; Everything turns around

**G**                    **C**  
Terrors may be coming-  
**G**                    **C**  
they are only games.  
**Em**                    **C**            **Em**                    **C**  
Everything turns around; Everything turns around

**G**                    **C**  
Sirens may be sounding.  
**G**                    **C**  
Roads are closing down.  
**Em**                    **C**            **Em**                    **C**  
I am a true believer; I am a true believer.

**G**                                    **C**  
So grab your pills and pillows.  
**G**                                    **C**  
Take what you'll remember.  
**Em**                    **C**            **Em**                    **C**  
Everything turns around; Everything turns around.
