[Verse]
```
          A
```
I ve spent all of my time on the road
```
                        E             B
```
Sleeping my days away but you should know
```
                        A
```
That I m reflecting on who I ve let go
```
                E                 B
```
The people I ve hurt in ways I ll never know

```
                    C#      B
```
And I never meant to be hurtful to you
```
 A
```
Please don t hate me
```

All I can say I did, all I could do

[SOLO 1]
  A E C#m G#m A E B

[Verse]
```
            C#m         A
```
I ve spent all of my nights wide awake
```
              E                 B
```
Wishing for some kind of poison to take
```
 E        C#m                 A
```
So that my conscience would just take a break
```
              E                 B
```
I am so tired of the noise that it makes

```
      E                   B
```
I m guilty enough without hearing it twice
```
 A
```
Please don t hate me
```
            E           A    B
```
You won t give it up but it s all in your eyes

```
