People Always Talk About The Weather
Yonderboi

Notes:
The song depends heavily on instruments, so one guitar by itself probably
will make you feel something s missing. If you can find another guitar that
will play the solo simultaneously, I m pretty sure it ll sound great. I
haven t got the chance to try it though, sorry.
The solo tab in the link below works perfect with this tab.

Am = 555775
G = 334553
Em = 000220
*** You can do a trick in the bridge part. You should play not a full measure
but half measure for the first Em, then quickly change to the second part of
the intro in the link above. Easier with finger strumming, but not that hard
with a pick neither, give it a try, i say.

 [Solo]

 Am   **G**
 Day by day I won t get younger
