

Weight Of The World  
Young Guns

Hey! This is my first attempt at figuring out chords to a song, so forgive me if there are any mistakes! To be honest, it most probably will, but meh. This is the acoustic version of the song, but if you prefer to play it with the amp and the overdrive/gain thingy, then it s your choice :) I guess it would be best to listen to the song first to figure out the strumming pattern... Also, I have corrected some spelling mistakes in the lyrics, but if you find any then please point them out to me :)

Note: If you for search the live acoustic version on YouTube, you ll find that it sounds different to the actual song. These chords are for the acoustic, not the original song.
